

# JOHN DOE

## Data Manipulation Specialist

johndoe@example.com | 123-456-7890 | New York, USA | LinkedIn | GitHub

### PROFESSIONAL SUMMARY

Highly motivated data manipulation specialist with expertise in data processing, analysis, and visualization. Proficient in SQL, database management, and data integration. Skilled in data quality and validation, business intelligence, and reporting.

### EDUCATION

#### Bachelor of Science in Computer Science

New York University, 2010-2014

### TECHNICAL SKILLS

**Programming Languages:** Python, R

**Database:** SQL, MySQL

**Business Intelligence:** Tableau, Power BI

**Machine Learning:** TensorFlow, Keras

**Tools & Technologies:** Apache Spark, Hadoop, AWS, Azure

### EXPERIENCE

#### Data Analyst | ABC Corporation | 2018-2020

- Designed and developed data visualizations using Tableau and Power BI to communicate insights to stakeholders.
- Developed and maintained complex SQL queries to extract and manipulate large datasets.
- Collaborated with cross-functional teams to identify business needs and develop data-driven solutions.
- Created and implemented data quality and validation processes to ensure data accuracy and integrity.
- Developed and maintained reports using business intelligence tools to provide insights to stakeholders.

#### Data Scientist | DEF Company | 2020-2022

- Developed and deployed machine learning models using TensorFlow and Keras to predict customer behavior.
- Designed and developed data pipelines using Apache Spark and Hadoop to process large datasets.
- Collaborated with data engineers to design and implement data warehouses using AWS and Azure.
- Developed and maintained data visualizations using Matplotlib and Seaborn to communicate insights to stakeholders.
- Created and implemented data quality and validation processes to ensure data accuracy and integrity.

### PROJECTS

#### Data Visualization Dashboard

**Tech Stack:** Tableau, Power BI, Python, R

- Designed and developed a data visualization dashboard using Tableau and Power BI to communicate insights to stakeholders.
- Developed and maintained complex SQL queries to extract and manipulate large datasets.
- Collaborated with cross-functional teams to identify business needs and develop data-driven solutions.
- Created and implemented data quality and validation processes to ensure data accuracy and integrity.
- Developed and maintained reports using business intelligence tools to provide insights to stakeholders.

#### Machine Learning Model Deployment

**Tech Stack:** TensorFlow, Keras, Python, R

- Developed and deployed a machine learning model using TensorFlow and Keras to predict customer behavior.
- Designed and developed data pipelines using Apache Spark and Hadoop to process large datasets.
- Collaborated with data engineers to design and implement data warehouses using AWS and Azure.
- Developed and maintained data visualizations using Matplotlib and Seaborn to communicate insights to stakeholders.
- Created and implemented data quality and validation processes to ensure data accuracy and integrity.
