

PEDDI YAMUNA

CI/CD DevOps Developer

k.venky5678@gmail.com | +91 6281318153 | Hyderabad | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Engineered CI/CD pipelines with DevOps tools, Developed REST APIs with Python Flask and Node.js, Optimized system functionality with Django and React.js, Architected scalable hospital management systems with MongoDB and Express.js, and Crafted responsive UI with React and Tailwind CSS.

EDUCATION

B.Sc Computer Science | KBN College | 2022 - 2025

Cumulative Grade Point Average (CGPA): 8.76

TECHNICAL SKILLS

Programming Languages: Python, React.js, Express.js, Java, JavaScript

Web Technologies: HTML5, CSS3

Database Management: MongoDB, SQL

DevOps Tools: CI/CD, GitHub, Jira, Jenkins, Git

Frontend Development: React, Tailwind CSS, Redux

Backend Development: Node.js, Django, REST APIs, Spring Boot

EXPERIENCE

Medico – Hospital Management System | Internship | Nov 2024 – Apr 2025

- Resolved complex technical challenges by developing a Django-based Hospital Management System with.
- Amplified system functionality by implementing appointment scheduling, doctor management, and patient records.
- Assisted in streamlining hospital workflow by managing database operations, modular views, templates,.

DevOps Internship | Internship | May 2024 – Jun 2024

- Synchronized source code using Git and GitHub for version control, branching, and.
- Procured CI/CD workflows using Jenkins and tracked tasks and issues using Jira.
- Crafted REST APIs using Python Flask and Docker, reducing latency by 40%.

PROJECTS

Medico – Hospital Management System

Tech Stack: Django, Python, HTML, CSS, JavaScript, Bootstrap, SQLite

- Updated Django-based hospital management system architecture with role-based modules for Admin, Doctor,.
- Maximized appointment scheduling efficiency by implementing secure OTP authentication, reducing wait times.
- Brokered seamless integration of responsive UI with Django views, models, and database.

AI Chatbot – Real-Time Intelligent Chat Application

Tech Stack: MongoDB, Express, React, Node.js, Redux, Web Socket

- Developed a real-time AI chatbot with Redux-based state management and dynamic user.
- Integrated Mistral AI API and WebSockets to generate intelligent responses and enable.
- Designed REST APIs and stored chat history in MongoDB for scalable and.

Festival Shopping Website

Tech Stack: React, HTML, CSS, JavaScript, Bootstrap, jQuery

- Leveraged React and JavaScript to design a festival-themed e-commerce website with 500+.
- Rebuilt product listings and discounts using React and JavaScript, resulting in 25%.
- Examined customer feedback to redesign the website's responsive UI, improving user engagement.
