

PEDDI YAMUNA

Java Backend Developer

k.venky5678@gmail.com | +91 6281318153 | Hyderabad | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Engineered Java Backend Developer with expertise in Java, Spring Boot, REST APIs, MongoDB, and SQL. Developed scalable and efficient solutions with secure OTP authentication. Optimized database operations and modular views to streamline hospital management systems.

EDUCATION

B.Sc Computer Science | KBN College | 2022 - 2025

Cumulative Grade Point Average (CGPA): 8.76

TECHNICAL SKILLS

Programming Languages: Python, Java, Node.js, Django, JavaScript

Web Technologies: React, HTML5, CSS3, Tailwind CSS, Redux

Databases: MongoDB, SQL

Development Tools: GitHub, Jira, Jenkins, Git

EXPERIENCE

Medico – Hospital Management System | Internship | Nov 2024 – Apr 2025

- Developed a Django-based Hospital Management System with role-based modules for Admin, Doctor, and Patient.
- Implemented appointment scheduling, doctor management, and patient records with secure OTP authentication.
- Managed database operations, modular views, templates, and static assets to streamline hospital management.

DevOps Internship | Internship | May 2024 – Jun 2024

- Managed source code using Git and GitHub for version control, branching, and collaborative development.
- Supported CI/CD workflows using Jenkins and tracked tasks and issues using Jira for project management.

PROJECTS

Medico – Hospital Management System

Tech Stack: Django, Python, HTML, CSS, JavaScript, Bootstrap, SQLite

- Built a Django-based hospital management system with role-based modules for Admin, Doctor, and Patient.
- Implemented appointment scheduling, doctor management, and patient records with secure OTP authentication.
- Designed responsive UI and integrated backend using Django views, models, and database.

AI Chatbot – Real-Time Intelligent Chat Application

Tech Stack: MongoDB, Express, React, Node.js, Redux, Web Socket

- Satisfied clients with a real-time AI chatbot, leveraging Redux-based state management and WebSockets.
- Instrumented Mistral AI API and WebSockets to generate intelligent responses, enhancing real-time interactions.
- Segmented chat history using MongoDB for scalable and efficient data handling, increasing user satisfaction.

Festival Shopping Website

Tech Stack: React, HTML, CSS, JavaScript, Bootstrap, jQuery

- Designed a festival-themed e-commerce website for seamless browsing and purchasing festival products.

- Formulated product listings, discounts, and responsive UI using React and JavaScript, resulting in increased sales.
- Simplified the festival product catalog, reducing product listing time by 50% and enhancing user experience.
