

PEDDI YAMUNA

JavaScript Fullstack Developer

k.venky5678@gmail.com | +91 6281318153 | Hyderabad | LinkedIn | GitHub

PROFESSIONAL SUMMARY

JavaScript Fullstack Developer with experience in React, Node.js, and MongoDB, Engineered scalable systems, Developed responsive UI, and Optimized database operations.

EDUCATION

B.Sc Computer Science | KBN College | 2022 - 2025

CGPA: 8.76

TECHNICAL SKILLS

Programming Languages: Python, React.js, Express.js, HTML5, Java, CSS3, JavaScript

Databases: MongoDB, SQL

Development Tools: GitHub, Jira, Git

Frontend Technologies: React, Tailwind CSS, Redux

Backend Technologies: Node.js, Django, REST APIs, Spring Boot

DevOps Tools: CI/CD, Jenkins

EXPERIENCE

Medico – Hospital Management System | Internship | Nov 2024 – Apr 2025

- Designed a scalable Django-based Hospital Management System with role-based modules for Admin.
- Implemented appointment scheduling, doctor management, and patient records with secure OTP authentication.
- Serviced database operations, modular views, templates, and static assets to streamline hospital.

DevOps Internship | Internship | May 2024 – Jun 2024

- Utilized Git and GitHub for version control, branching, and collaborative development across.
- Streamlined CI/CD workflows using Jenkins, integrating with Jira for project management, resulting.
- Authored and maintained documentation for 20 complex technical projects, ensuring 95% accuracy.

PROJECTS

Medico – Hospital Management System

Tech Stack: Django, Python, HTML, CSS, JavaScript, Bootstrap, SQLite

- Built a Django-based hospital management system with role-based modules for Admin, Doctor.
- Implemented appointment scheduling, doctor management, and patient records with secure OTP authentication.
- Designed responsive UI and integrated backend using Django views, models, and database.

AI Chatbot – Real-Time Intelligent Chat Application

Tech Stack: MongoDB, Express, React, Node.js, Redux, Web Socket

- Ideated a real-time AI chatbot with Redux-based state management and dynamic user.
- Revolutionized conversational experiences by integrating Mistral AI API and WebSockets, achieving 95%.
- Planned and designed REST APIs and stored chat history in MongoDB, resulting.

Festival Shopping Website

Tech Stack: React, HTML, CSS, JavaScript, Bootstrap, jQuery

- Customized a festival-themed e-commerce website for seamless browsing and purchasing festival products.

- Augmented product listings, discounts, and responsive UI using React and JavaScript, resulting.
- Deepened customer experience by implementing a robust festival product catalog, featuring over.
