

JOHN DOE

Infrastructure Specialist in System Administration

johndoe@example.com | 123-456-7890 | New York, USA | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Infrastructure Specialist with expertise in system administration, cloud computing, and cybersecurity. Proficient in Ansible, Terraform, and ITIL processes. Engineered scalable infrastructure solutions, optimized cloud-based applications, and ensured seamless operations across various applications and infrastructure components.

EDUCATION

Bachelor's Degree | New York University | 2015-2019

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, Azure, Google Cloud, Ansible, Terraform

Operating Systems: Windows, Linux, Unix

Database: MYSQL, MSSQL, PostgreSQL

Security: ITIL, Cybersecurity, Load Balancing, CDN

Tools & Technologies: Logstash, ElasticSearch, Kibana, Docker

EXPERIENCE

Infrastructure Specialist | ABC Corporation | Jan 2020 - Dec 2022

- Provided 24/7 technical support for cloud-based solutions, ensuring seamless operations across various applications, DevOps, middleware, security, and infrastructure components.
- Developed and configured infrastructure and configuration as code using Ansible and Terraform, and administered Dev, Test, and Production environments hosted on Windows, Linux, and Unix servers.
- Ensured systems were safe and secure against cybersecurity threats, identified and fixed technical problems, and installed software updates and fixes.
- Managed Application ID, provided cloud elasticity by auto-scaling resources based on business requirements, and ensured DR and manual redundancy failover capabilities.
- Identified and resolved issues involving APIs, application services, and infrastructure problems, and escalated issues to the appropriate support level when necessary.

System Administrator | DEF Company | Jan 2019 - Dec 2020

- Installed and configured databases such as MYSQL, MSSQL, and PostgreSQL, including ensuring database security and performance.
- Worked with cloud security features, including load balancing and CDN options provided by multiple cloud vendors, such as Azure Load Balancer and Application Gateway.
- Installed and maintained a logging cluster using Logstash, ElasticSearch, and Kibana to parse logs from applications and Docker containers.

PROJECTS

Project Name

Tech Stack: Ansible, Terraform, AWS, Linux
