

JOHN DOE

React Developer

john.doe@example.com | +91 1234567890 | Delhi, India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Highly motivated and detail-oriented React Developer with a passion for building robust, cloud-native frontend applications. Proficient in React, AWS, and modern JavaScript, with a strong understanding of state management best practices and experience in collaborating with backend and DevOps teams.

EDUCATION

Bachelor of Science in Computer Science

Indian Institute of Technology, 2015-2019

TECHNICAL SKILLS

Programming Languages: JavaScript, Python

Web Technologies: React, HTML, CSS

Backend: Node.js, Express.js

Database: MongoDB

Tools & Technologies: AWS, Git

EXPERIENCE

Senior React Developer | ABC Corporation | Jan 2020 - Present

- Designed, developed, and maintained responsive and scalable frontend applications using React.js and related technologies.
- Implemented state management solutions such as Redux, Context API, or MobX to create seamless user experiences.
- Integrated frontend applications with backend services and RESTful APIs.
- Deployed, hosted, and optimized frontend applications using AWS services including AWS Amplify, S3, CloudFront, Lambda, and API Gateway.
- Automated build and deployment processes using AWS CodePipeline, CodeBuild, or third-party CI/CD tools integrated with AWS.
- Monitored application performance and troubleshooted issues leveraging AWS CloudWatch and other monitoring tools.
- Collaborated closely with backend and DevOps teams to design and implement cloud-native frontend solutions.
- Ensured frontend security best practices, including authentication and authorization using AWS Cognito or similar identity management solutions.
- Wrote thorough unit and integration tests to ensure application reliability and maintainability.

PROJECTS

E-commerce Website

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Designed and developed a responsive e-commerce website using React.js and related technologies.
- Implemented state management solutions using Redux and Context API.
- Integrated frontend applications with backend services and RESTful APIs.
- Deployed and hosted the application using AWS services including S3 and CloudFront.

Blog Website

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Developed and maintained a blog website using React.js and related technologies.
- Implemented state management solutions using Redux and Context API.
- Integrated frontend applications with backend services and RESTful APIs.
- Deployed and hosted the application using AWS services including S3 and CloudFront.
