

JOHN DOE

Software Engineer

john.doe@example.com | 123-456-7890 | New York, USA | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Highly motivated and detail-oriented software engineer with a strong background in frontend development. Proficient in modern frontend frameworks, JavaScript, and data visualization libraries. Engineered responsive and intuitive interfaces, developed interactive visualizations, and optimized UI components for performance.

EDUCATION

Bachelor of Science in Computer Science

New York University, 2018-2022

TECHNICAL SKILLS

Frontend Frameworks: React.js

Programming Languages: JavaScript

UI/UX Tools: D3.js, Chart.js

Tools & Technologies: Git, GitHub Pages

EXPERIENCE

Frontend Developer | ABC Corporation | Jan 2022 - Present

- Built responsive and intuitive interfaces supporting complex design workflows
- Implemented interactive visualizations — graphs, charts, and tables
- Supported multi-user collaboration features and real-time updates
- Worked closely with backend teams to integrate UI components with APIs
- Developed modular and reusable UI components with performance in mind

Junior Software Engineer | DEF Company | Jan 2020 - Jan 2022

- Developed multiple features for a web application using React.js and JavaScript
- Implemented data visualization using D3.js and Chart.js
- Worked on improving the performance of the application using lazy loading and code-splitting
- Collaborated with the design team to implement UI/UX changes
- Participated in code reviews and ensured high-quality code

PROJECTS

Personal Project: To-Do List App

Tech Stack: React.js, JavaScript, HTML5, CSS3

- Built a responsive To-Do List App using React.js and JavaScript
- Implemented data storage using local storage
- Added features for adding, removing, and editing tasks
- Improved the user experience using UI/UX principles
- Deployed the app on GitHub Pages

Personal Project: Weather App

Tech Stack: React.js, JavaScript, HTML5, CSS3

- Built a Weather App using React.js and JavaScript
- Implemented data visualization using D3.js
- Added features for searching cities and displaying weather data

- Improved the user experience using UI/UX principles
- Deployed the app on GitHub Pages
