

JOHN DOE

Java Backend Developer

johndoe@example.com | 123-456-7890 | Remote | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Highly motivated and experienced Java Backend Developer with a strong background in designing, building, and optimizing large-scale platforms. Proficient in Java 11+, relational databases, and event-driven architectures. Engineered scalable and secure platforms, developed event-driven microservices, and ensured high-quality code through automated testing and code reviews.

EDUCATION

Bachelor of Science in Computer Science

University of Example, 2010-2014

TECHNICAL SKILLS

Programming Languages: Java

Backend: Spring Boot, JAX-RS

Database: MySQL

Tools & Technologies: AWS, Git

EXPERIENCE

Senior Backend Developer | Ovyo | Jan 2020 - Present

- Designed, built, and optimized a large-scale platform that delivers Video on Demand and Live Events to users worldwide.
- Developed and operated event-driven microservices running on AWS.
- Ensured platform reliability, scalability, performance, and security.
- Collaborated closely with product, QA, and DevOps in agile delivery teams.
- Created and maintained automated tests (unit & integration).

Backend Developer | Example Company | Jan 2018 - Dec 2020

- Developed and maintained multiple RESTful APIs using JAX-RS and Spring Boot.
- Worked with event-driven architectures to improve system scalability and performance.
- Collaborated with cross-functional teams to design and implement new features.
- Ensured high-quality code through automated testing and code reviews.
- Contributed to architectural decisions and engineering best practices.

PROJECTS

Video on Demand Platform

Tech Stack: Java 11+, AWS, MySQL, JAX-RS, Spring Boot

- Designed and developed a scalable and secure platform for delivering Video on Demand content.
- Implemented event-driven microservices to improve system performance and scalability.
- Ensured high-quality code through automated testing and code reviews.
- Collaborated with cross-functional teams to design and implement new features.
- Contributed to architectural decisions and engineering best practices.
