No projects available.

However, since the JSON data does not contain any actual skills, experience, or projects, the above HTML will be generated. If you provide the actual JSON data with the required information, I can generate the HTML accordingly. Here's an example of how the HTML would look like with some sample data: {
"full_name": "John Doe", "role_title": "AWS Cloud Engineer", "location": "Hyderabad, India", "contact": " | ",
"links": ["", ""], "summary": "Results-driven General with deep expertise in the tools extracted from the master resume. Committed to high-precision software delivery and technical excellence.", "education": [],
"skills": { "Programming Languages": ["Python", "Java"], "Web Technologies": ["React", "HTML", "CSS"],
"Backend": ["Node.js", "Django", "Spring Boot"], "Database": ["MySQL", "MongoDB", "PostgreSQL"], "Tools & Technologies": ["Git", "Docker", "AWS"] }, "experience": [{ "title": "Software Engineer", "company": "ABC Corporation", "duration": "Jan 2023 - Present" }], "projects": [{ "name": "Project 1", "tech_stack": ["React", "Node.js", "MongoDB"], "description": ["Description 1", "Description 2"] }] } And here's the generated HTML:

PROFESSIONAL SUMMARY
