

JOHN DOE

Software Developer

johndoe@example.com | 123-456-7890 | New York, USA | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Highly motivated software developer with expertise in developing scalable and efficient software solutions using Java, Spring, and Hibernate. Engineered multiple Java applications using J2EE, Spring, Spring MVC, and Spring Boot frameworks. Developed frontend integrations using HTML and JavaScript. Performed unit testing using JUnit and ensured efficient application performance.

EDUCATION

Bachelor of Science in Computer Science

New York University, 2015-2019

TECHNICAL SKILLS

Programming Languages: Java

Frameworks & Libraries: Spring, Hibernate, JPA, JUnit

Web Technologies: HTML, JavaScript, CSS

Database: MySQL, PostgreSQL

Tools & Technologies: Apache Tomcat, Maven, Git

EXPERIENCE

Senior Software Developer | ABC Corporation | Jan 2020 - Present

- Developed multiple Java applications using J2EE, Spring, Spring MVC, and Spring Boot frameworks.
- Implemented Hibernate and JPA for database connectivity and ORM solutions.
- Created and maintained RESTful web services and Microservices-based applications.
- Worked with Apache Tomcat servers and Maven build tools.
- Developed frontend integrations using HTML and JavaScript.
- Performed unit testing using JUnit and troubleshooted application issues efficiently.
- Maintained application logging and monitoring using Log4j.
- Supported application deployment, debugging, and performance tuning activities.

PROJECTS

E-commerce Website

Tech Stack: Java, Spring, Hibernate, JPA, Apache Tomcat, Maven

- Developed a scalable e-commerce website using Java, Spring, and Hibernate.
- Implemented a robust database connectivity solution using JPA.
- Created a RESTful web service for product management.
- Integrated frontend using HTML and JavaScript.
- Performed unit testing using JUnit and ensured efficient application performance.

Social Media Platform

Tech Stack: Java, Spring, Hibernate, JPA, Apache Tomcat, Maven

- Developed a social media platform using Java, Spring, and Hibernate.
- Implemented a robust database connectivity solution using JPA.
- Created a RESTful web service for user management.
- Integrated frontend using HTML and JavaScript.

- Performed unit testing using JUnit and ensured efficient application performance.
